

Industrial Tour Summary

2022

**United Institute of Pharmacy, Naini,
Prayagraj**

United Institute of Pharmacy, Naini, Prayagraj (A unit of United Group of Institutions,) organized one week (12 May to 19 May 2022) industrial visit & tour to Chandigarh-Baddi-Manali. The student of B. Pharm 8th Semester as a part of their curriculum along with the faculty members of the United Institute of Pharmacy visited Sarvotham Care Pharma, Alaina Health Care Limited, Asian Pharma, Ion Healthcare Pvt. Ltd. and Scott-Edil Advance Research Laboratories & Education Limited. Student also enjoyed the snow fall in Manali. The purpose of this industrial visit was to enhance the practical knowledge of students giving them real time industrial exposure to grasp on Pharmaceutical Industrial concepts & culture. During the visit, students received complete & continuous guidance from production managers of respective company and also noted down the key points during their visit in different departments. Students were introduced to different areas of stores, Dosage forms manufacturing section, packaging, ETP plant. They were also visited the QA & QC Departments that gave them insight on the different equipment's used for the analysis.

On 13rd May students visited Scott-Edil Advance Research Laboratories & Education Limited and Alaina Health Care Limited. On arrival at the Company, the Admin-HR & production manager of the company welcomed the students. A presentation session was held to discuss the background of company, their business model, and the manufacturing process. Apart from this carrier guidance has been given by production head. Then students visited the factory and enjoyed the watching of manufacturing process with fully automated Machines. On 14th May student visited Sarvotham Care Pharma, Asian Pharma and Ion Healthcare Pvt. where the student visited the manufacturing facility. The student also visited the packaging section of these companies where they witnessed ongoing packaging process both manual and automatic. The students also visited the all sections of manufacturing unit along with effluent treatment plants of these companies and saw the treatment procedure of effluents to keep the environment safe from toxic effluents.

It was an enriching experience for Students to learn at the best pharmaceutical industry. All the students got the real practical knowledge & Experience during the industrial visit. Our students could link the theoretical knowledge learned during their theoretical classes at college with the practical processes occurring in the industry and could compare the lab scale manufacturing with large scale manufacturing. Overall, the industrial visit provided the B. Pharm students with a practical understanding of the production, quality assurance, and quality control of medicines. It gave them an opportunity to observe the various processes involved in the pharmaceutical industry and to interact with professionals working in the field. The Industrial visit was successfully completed under the guidance of Principal United Institute of Pharmacy Prof. (Dr.) Alok Mukerjee and was co-ordinated by faculty members of UIP Dr. Anil Kumar Singh, Mr. Amitabh Tripathi, Mrs. Akanksha Gupta & Miss. Aimen Salman.
